

OUR BUSINESS

Resultant Finance was founded in 2002 by its current CEO Dr Mdu Gama.

It is one of the leading asset rental companies in South Africa.

The company is a specialist in packaging innovative asset rental solutions for JSE listed and unlisted corporates, parastatals, various government departments and municipalities

WHY SELECT OUR RENTAL SOLUTION?

There are certain asset types whose ownership does not make economic sense to most entities. These are mainly assets that depreciate drastically such as computers (both laptops and desktops), printers, communication equipment, servers, yellow metal equipment, medical equipment and other technology related assets.

The Resultant solution is unique since it offers:

- Flexible Payment Terms
- A wholistic Solution
- Cost Center Billing Information
- Technology Buyback Solution
- Compliance with Applicable Legislation
- Pre-Approved Finance Facilities

FINANCE CRITERIA

OUR SOLUTION IS DESIGNED TO ADDRESS YOUR NEEDS

Most of our asset rental solutions are structured over 36, 48 or 60 months. At the end of the initial period the client has the following options:

- Return obsolete equipment and upgrade for new technology;
- Return obsolete equipment with no further obligation; or
- Re-rent equipment at a significantly reduced cost.

We believe most clients derive maximum satisfaction from our finance solution if the technology related equipment is upgraded within 3 or 5 years.

In instances where client requirements dictate a different cycle, we are always more than delighted to discuss these with clients and come up with solutions that take into cognisance those specific requirements.

OUR CSI

At Resultant we believe that a strong foundation for South Africa should be the education for both its old and young citizens. In this regard, all our social responsibility initiatives are biased towards education. These are some of the initiatives that we have embarked upon in the recent past:

01 *Paying tuition fees for deserving youth currently serving prison sentences*

02 *Paying full tertiary fees (including books) for deserving students coming from rural communities studying medicine (MB ChB) at local universities*

03 *Buying primary and high school uniforms for deserving children in rural communities*

04 *Supplying rural and township schools with computer and science laboratories*

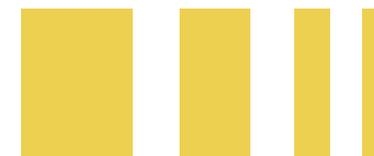

05 *Ensuring that a certain percentage of our used equipment is donated to the deserving (under-resourced) communities.*
